

Simple Calculator[first no = 11 , second no = 22 and operation = multiply]

The screenshot shows a web browser window with the title "Hello, world! - Chromium". The address bar displays "localhost:3000/calculator". The browser's tab bar shows several open tabs, including "Zara Sa Lyric Video - J...", "res.redirect with data - G...", "How do I redirect in expr...", "Hello, world!", and "sendFile with parameter...". The browser's bookmark bar contains various links like "Apps", "JSONPlacehol...", "Android Appli...", "Save data in a L...", "Torrent Searc...", "Accessing (Pu...", "How To Add a...", "(3) How To Tal...", "Graduation Re...", "Sample Test...", "Amazon Web...", "Dockerize a Re...", and "Reading list".

The calculator interface is centered on the page and consists of the following elements:

- A large heading "CALCULATOR" in bold, black, uppercase letters.
- A label "First Number" followed by a text input field containing the value "11".
- A label "Second Number" followed by a text input field containing the value "22".
- A label "Operation" followed by a dropdown menu currently showing "Add".
- A blue button labeled "Submit" located below the operation dropdown.

The result is: 242
